Mehak Budhiraja

Computer Science Graduate | Software Development | Data & AI Enthusiast

+917206108903 mehakbudhiraja271@gmail.com LinkedIn Github

PROFESSIONAL SUMMARY

Computer Science Engineering graduate and AI Enthusiast with a solid grounding in software development, data analysis and certified knowledge of AI technologies. Skilled in Python, Java, JavaScript, and MERN stack development, with practical experience integrating AI features into web platforms. Co-authored academic research on AI ethics, demonstrating strong analytical capability. Seeking an entry-level engineering role to build innovative, intelligent, and scalable software solutions.

EDUCATION

Bachelor of Engineering (CSE) | CGPA: 8.15 — 2022 - 2026
Chitkara University, Punjab

Class XII (CBSE) — 2021 - 2022
Springfields Public School, Haryana

Class X (CBSE) — 2019 - 2020
Springfields Public School, Haryana

SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Frontend:** HTML5, CSS3, React.js, Tailwind CSS, Vite
- **Backend & Database:** Express.js, Node.js, MongoDB, SQL
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object Oriented Programming, DBMS, Operating Systems, Computer Networks.
- **Developer Tools:** Git, Github, VS Code, Figma
- **Cloud & AI:** Artificial Intelligence, Basics of AWS, Basics of Machine Learning.

PROJECTS

AI-Interview Preparation | Github
- Currently developing an AI-powered interview preparation platform using **React.js**, **Vite**, **Tailwind CSS**, **Node.js**, **Express.js**, and **MongoDB** to simulate technical interview experiences.
- **Integrating AI-based question generation** and real-time feedback to help users practice interviews, evaluate responses, and improve communication and technical skills.

Faculty Management System | Github
- Engineered a **MERN**-based Faculty Management System with features including faculty profile management, attendance tracking, and workload allocation, using reusable React components for a responsive user interface.
- Built secure **Node.js/Express.js REST APIs** with **JWT**-based role authentication and optimized **MongoDB** database operations to improve application performance and scalability.

Blood Bank Management System | Github
- Developed a **full-stack** Blood Bank Management System using the **MERN** stack to streamline donor registration, blood inventory management, and blood request processing.
- Implemented **JWT-based authentication**, role-based access control, and secure **RESTful APIs** to ensure reliable and protected data management.

ACHIEVEMENTS AND CORE COMPETENCIES

- Completed **Artificial Intelligence/ Machine Learning** Certification - **IISDT.**
- **Co-author and Presenter –** Authored a research paper titled **"Ethical and Privacy Challenges in AI-Based Learning Analytics"** and submitted it to **IFJMR** for academic reference.
- **Content Writing Executive** at IE(I) CSE Student Chapter: This helped me gain **Teamwork**, **Communication**, **Leadership** skills.
